ABOUT ME

Software Engineer with a strong foundation in Linux systems, networking, scripting, and software testing. Hands-on experience in functional testing, defect analysis, and quality assurance within Sony's PlayStation ecosystem. Skilled in test automation concepts, CI/CD workflows, debugging, and system troubleshooting with practical knowledge of C/C++, Python, Bash, Git, and Docker. Passionate about software quality, graphics systems, and building reliable automated testing solutions in fast-paced engineering environments.

SKILLS

Programming Languages: C/C++, Bash, Python, JavaScript.

Operating System: Linux (Debian), Windows Server.

Networking: TCP/IP, DHCP, DNS, HTTP, Cisco Packet Tracer.

DevOps & CI/CD: VirtualBox, GitLab CI, Docker, Terraform, Kubernetes

Test Automation Tools: Playwright, Pytest.

Project & Test Management Tools: Jira, TestRail, Confluence.

Developer Tools: Git, VS Code, Makefile, Vim, MariaDB (SQL).

Problem-Solving: Adept at analyzing complex issues, identifying root causes, and implementing efficient solutions.

Communication: Skilled at explaining ideas clearly, simplifying complex concepts, and understanding others effectively.

Collaboration: Experienced in working effectively within a diverse teams to achieve shared project goals.

Certificates: AWS Cloud Quest - Cloud Practitioner, Cisco Netacad - Network Technician Career Path.

Languages: English (C1), Polish (B1).

EXPERIENCE

QA Test Associate

Lionbridge Games

September 2025 – Present

Warsaw, Poland

- Executing smoke, functional, and regression testing across multiple test cycles, analyzing defects, forming clear conclusions, and driving decisions to improve product reliability and performance.
- Collaborating with developers and product teams in an international Agile environment, communicating effectively, raising critical issues proactively, and contributing to team-driven solutions throughout the SDLC.
- Independently reviewing technical documentation and in-game systems across multiple builds, applying analytical thinking, staying persistent on complex issues, and ensuring stable, high-quality releases.

PROJECTS

CPP Modules | C++, OOP, Memory Management | [Link](#)

- Developed multiple C++ projects focused on object-oriented programming concepts including classes, inheritance, polymorphism, and encapsulation.
- Implemented operator overloading, abstract classes, and interfaces following modern C++ practices.
- Built modular applications emphasizing memory management, references, pointers, and dynamic allocation.
- Applied debugging, code organization, and STL fundamentals to maintain clean, reusable code.

Philosophers | C, POSIX Threads, Concurrency & Synchronization | [Link](#)

- Solved the Dining Philosophers problem in C using threads and mutexes to manage concurrent execution.
- Developed synchronization mechanisms to overcome race conditions, deadlocks, and resource starvation.
- Built precise timing and monitoring systems for philosopher states (eating, sleeping, thinking, death detection).
- Optimized thread management and memory while ensuring stable execution under strict timing constraints.

Cub3D | C, Raycasting, Graphics Programming, MiniLibX | [Link](#)

- Developed a 3D graphics engine in C using raycasting techniques inspired by early FPS game Wolfenstein 3D.
- Implemented texture mapping, player movement, collision detection, and real-time rendering using MiniLibX.
- Built map parsing and validation systems, handling dynamic player positioning and environment configuration.
- Managed event handling, keyboard inputs, and memory optimization to ensure smooth rendering and performance.

EDUCATION

42 Warsaw

Warsaw, Poland

Software Engineering — Play, Iliad Group

March 2024 – Present

Coursework: Software Engineering Fundamentals, Algorithms & AI, Network & System Administration, System Programming, Cybersecurity, Database & Data Management.

Akademia Humanistyczno - Ekonomiczna w Łodzi

Łódź, Poland

Bachelor of Arts — Game Art and 3D Graphics

October 2018 – December 2021

Specialization: Game Engine Systems, Real-Time Rendering, Visual Scripting (Unreal Engine 4, Blueprints).

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (GDPR).
